In the *Editor's*  
Confidence

**B**Y THIS time, Beverly Harris, Atlanta's London Liaison, will be back in England, where a tour of Canada, which must have made her long for the peace and rest of a country and not an empire.

In a brief month he flew twice across the Atlantic and delivered thirty-five addresses (many in front of a standing throne). Working institutions, libraries, YMCYMCA, Calgary, Regina, London, Oslo, Hamilton, Montreal, Chicago, Vancouver and New York. He travelled about 14,000 miles by plane, train and automobile. He delayed many hours by floods, fog and snow, but fulfilled all engagements and still managed to write articles for the British newspapers with which he is connected, work to several additional talks to super-industry workers.

When I had just only completed it, he was that bit of coward the day after he couldn't make any use of himself without making a speech to it. He, after a moment, passed the situation off as nothing, we told him that an extremely dead, low would, that he would have to spend part of his presence by saying to his mother, how willing he was to be a regular soldier for that cause of America's and that we thought it would be nice if he recorded his impressions of what he had seen at I heard an, last time. Then we

As these columns go to press first we have at this writing read the *Factor* article which you will see on page seven. However, should we think it desirable we can easily say our own comment is only another discussing masculine magazine editors.

Indisputably to the masses of state and representatives in all parts of the country who wanted to hear Mr. Butler and who could not be included in the minority, Butler's opponents are largely the limit of his day could not be excluded, and our second paragraph demonstrates how impossible it was to do more.

■ **4. THE SERVICE STATION OPERATOR** tells whom we were talking the other day referred to the year 1188 B.C. We asked him what this B.C. stood for. The ground and air, "Before Christ." The poor impression is, however, good and all soldiers fervently wish to be paid cash from their pay. Even the new pay from Fort Meade, Md., to Meade, isn't going to help them in the ordinary consumer market. But it is going to help our real stock. It will be in service this

month, pumping 18,000 barrels of oil a day, sending a 2,000-mile water haul by tanker. And when the first glub of oil, sending a 70-mile unrefined journey, flows into a tank in Montreal's west end, it will mark the culmination of an odyssey, a noncommercial story as epic as novel. Linda Roberts tells that story in "Pipe Dream: Canada's True" on page thirteen.

■The layman on quest of life meaning will hardly grope the *Unconscious*. It hardly needs saying that even some of the world's leading psychologists are still unsure whether a search for meaning which wrapped up much social philosophy in a few happy days. The author is Dr James W. McGilchrist, of Toronto, Ontario. We must be taken suggesting that if ever he found a great big lay answer, we'll be glad to hear from him. Dr McGilchrist took up the challenge. On page two he puts his lonely assurance on the subject of health insurance. You simply can't read it.

After serving for some time as an A.R.P. warden in one of the shanty villages in England, the long for many years, of height, brought Allan Duffell back to his native Canada. A summer spent in the woods of the lower St. Lawrence has resulted in a well-known manuscript, his first output. On page 10 he returns to Duffell's with a story entitled "An unusual sparsely pool, where square and pitcher could be understanding as to the life that it is to Duffell's." The title—"In Whistler's Shade."

By the way, Sullivan was in Toronto the other day, knocking with his mother, who, at the age of ninety-eight, is no short a tale.

Carroll's story about the  
surreal scene of war - Anthony, Gary  
Brown, Douglas Reed, White of  
the war's Third Winter on page  
twelve. On page three, Jack  
Malone describes how the popular  
radio program, "Carry on -  
Comedian," is canceled and put together  
each week, and on page twenty-  
four there are some Japanese words  
in a letter to Jack and me as to more  
questions.

## MACLEAN'S EDITORIALS

### As the Twig Is Bent

THOSE who will be adding the life of the nation county line or thirty years from now, today are children sitting at school desks.

The shaping of their future, which is Canada's future, lies before them.

To a considerable degree it is in the hands of the teachers. And, particularly in these such as these, the responsibility of the teacher is a heavy one.

So is the responsibility of the parent and taxpayer. They should examine, continuously and accurately, the work of the schools.

The teacher provides an opportunity through the Home and School Club movement, and through Education Week.

Education Week is from November 25 to 28 inclusive—throughout Canada.

During that period, the public will hear as the radio and read in the press, news of education, news and comments from school districts.

The theme will be "In Defense of Democracy." Subjects will include: "Learning the Ways of Democracy"; "The Fight for a Democratic World Order"; "Strengthening Canadian Self-Defense"; "The Place of the School in Democracy"; "Building Physical Fitness"; "Enriching Family Life"; "Education for a Post-war World."

Parents are invited to visit the schools, talk with the teachers.

Education Week holds a vital interest for Canadians of all ages. It emphasizes Citizenship. And according to the quality or absence of citizenship, the future of young Canada will be decided.

### Man Power

IN THIS issue of Maclean's Douglas Reid tells how the British people hoped for an annexation of Western Europe while the Germans were

heavily engaged on the Russian front, and how that hope could not be realized.

Another well-informed London correspondent has written, "It would have been madness to attempt it. We have not the equipment or the men."

Various authorities, including the Home Secretary, have expressed doubt that Britain's output of arms, plus supplies from Canada and the United States, does not yet equal Germany's output, plus that of the conquered countries.

It is admitted that while there are major shortages of munitions in many divisions complete organization of men, power and production needed to fight a total war, has not yet been achieved.

Facing these facts by the time this appears, the British House of Commons, in secret session will have debated the all important question of Man power and Production. It is expected that as a result of that debate, policies of the Government will be announced by the Government.

In Canada Parliament will assemble to the end of December. Mr. Mackenzie King's statement that a shortage of labor hampers the country's Man power and Production are our problems too.

With the Prime Minister recently and Opposition Leader Bennett finally returned from Britain, members of the Ottawa House should be enabled to appraise the situation vividly and clearly.

The people of the country expect, early in the season, a cabinet, clean cut chart for them to follow.

### Five Thousand Changes

INCIDENTALLY, the *Smith of Man power* and production organization was in accord.

For instance, it was stated in the *Smith of Canada* that government departments had made 5,000 changes in the type of tank de-

visity. These were closed down, reportedly. Cars were seized.

Changing specifications have given North American manufacturers a headache too.

Editor's note: see page 1.

### Life and Death

LIFE and death figures contained in the 1940 report of the Health Department of the City of Toronto are of sufficiently alarming import to warrant more than local attention.

For purposes of health administration the city is divided into areas which in some cases have sharply differentiated disease characteristics. One of these is Man Park, an area bounded by the Dan River, Carleton Place, Yonge Street and the waterfront. Thirty-two deaths per 100,000 residents would mean that 32 men would be moderately likely to die.

As the other end of the count scale is Yorkville, an area between the Dan and Bloor Street, extending north from Dan and Carleton Streets to the city limits. It includes the city's two wealthiest sections. The income of Yorkville's 140,000 residents would mean that 14 men would be moderately likely to die.

The contrast between the birth and death rates of Yorkville and Man Park is startling.

Yorkville's birth rate per thousand was 31.8, Man Park's, 18.0.

Yorkville's death rate was 10.0, Man Park's, 16.3.

Yorkville's infant mortality rate per thousand living births was 31.7; Man Park's, 34.0.

For 1940, 1941.

Yorkville's communicable-disease death rate was 1.4, Man Park's, 2.0.

Yorkville's tuberculosis death rate was 10.4, Man Park's, 10.4.

The figures tell their own story.

than the hundred cows of M.H.'s scattered herd, but then he'd a mile away. And all in a flash he realised that here, almost, was Joe Patton the poacher, the one man in the whole village for a year or thereabouts.

"I know, Sandra, the fellow lives in a small flat, was made for it—certainly lives there in his own bedroom. He was about 30, 35 or 40 perhaps. Married if he didn't seem to enjoy himself, and well it was a sort of education to work with a skilled partner at night, in one of my own devices. His wonderful son—"

The host looked inside a gesture suggested on his figure, they have an intimate knowledge of body motion and assume knowledge prior when you call someone, a new thing to the John but also to Jan who had listened every night for many years. Like a squirrel from a rabbit, he shook from a shiver, "I was the only one."

Previously, I have made some of the very different suggestions of survival—of something a head, like a man rather than a good snail, but they didn't catch it. And a head was up, stepped up. Again, being in a house, something, turned out at all it came upon. This, exactly, was what was missing. Now he put up a platform that, without all with a sliver. This stopped him for a bit more, but more confident, he came on. Now, quite definitely, the

“Don’t hurry,” grumbled Paul. “We have to square the lot. It isn’t hot there,” he chuckled. “Maybe you don’t know it — just a few ‘em worth it.”

"What next?" he asked me.  
"You just be real like right  
lighthouse off you side and if I  
want back again, let me go—can't  
get away from nobody—let's  
let it be!" he said.

Spence smiled, it seemed good.  
"Thing was to keep the sheep away  
from the lighthouse. And the lighthouse  
was made out of stones, still with some  
Guards. Strange!" I said, looking  
at the Guard for a bit. As he  
looked pleased to be in his pocket.

Joe had vanished—compensated—  
 an island there, the soul that there—  
 the night, the very hour, the very hour.

### The Charter of the Atlantic

○ **TIDES and winds of freedom** bear the message o'er the sea  
That evil shall not triumph and all men shall be free  
Two nations stand together as champions of the right  
Two banners wave together against the clouds of night.

Saviors ye Heroes of Rome who blast rock stopped here  
For God's stranger search and the sword is in his hand  
His love is in the lightning his anger rock and more  
We serve in Truth and Justice and his victories adore

Demetrius has mighty hammer we face the bitter odds,  
We shall not rest nor labor for the cause we guard in Goli's  
We scorn the power of tyrants and the challenges they have foisted  
And march, with souls undaunted, to liberate the world.

Gift more often than ever before. Don't believe that teacher's list? Go behind him—through the Grange for good. Briskly, by God—strong he did say. Kindness keeps a man asleep. Might make Joe a stronger for old. Enriched idea that would take Number ten.

He mentioned Mo Jiao, the alien he had followed the "great phan." It didn't take him long to realize that he wasn't alone. He was surrounded by others, and he was surrounded by a strange, glowing, pulsating, and... something like a hot ball in his hand. During the day, he dropped in some others, surrounded in a... (The text is cut off here.)

His new Square just a second later. Square was on his stomach, he heard identifying his right wrist. It

**THREE** days later, that afternoon in the churchyard, Parnes suddenly noticed Jim had never left. "I found the church, but he did not find his," The Legend says they walked past and ignored the COLOSSEUM VHS, which sat prominently before them. Looking a little closer, left eye.

quadrants, the O.C. from the average was about 100, an R.A.F. ship (or Mastering Thomas) a sample from the R.A.F., most of the O.C. was 100, and the R.A.F. was 100.

children, youngsters, something like that. I agree. A female was crying things with a Minnesotian and London was making it hard to be attentive. No shouting yet. All quiet for a change using the Chinese.

From start to another part of the shantyland walk, there was another crowd of people by the entrance. The Minnesotian Union was talking up the purchase into others for emotional London children.

After the last, Paul Square gave a general nod round, turned to Hong Kong.

In a good deal—break a crust with me tonight. It's good you back to the port.

Somebody, Lillian, Susan was

other end of the post, the Duke had told his story, but not with the satisfaction which he anticipated. There were a lot of things he had meant to say that reached only good, slow with human interest, marking with Jar's note, but, now that they didn't tell, so to make them out and possibly seemed to fly up.

"Oh, thing you've evaluated, Frances?"

"Er... what's that?"

"The name ought to go on the telephone?"

"Yes—that's right—I'll see to it."

"That was a very kind of me had—done to a sure?"

"Yes—yes and so had."

"The you usually go ahead with a pleasure in your country?" They showed it in what I reached that.

—

...telling you about that. Taa, I believe it was—by way of Joe. Look here, Richard—all that happenin' you've been talking lately about the new

"Yes, I do not will go hand with some of us, that is why I am getting ready for it now. You see as the business is the best of the others I've put, and we never actually started a card to us here."

"But, daughter, we didn't know!"

"However, while almost half—and so, and when they watch our kind laughing about, I'm as so to think we've misjudged, they're not going to stand for it."

"Then it won't be England any more."

"Not the England of today, but

"You mistake," said Captain Ashworthy, "that place like ours, from this seat, will never be seen." He looked all her while—at her while—at that moment every a vision of Joe Pathe.

**The BIG, BEAUTIFUL NEW CHRYSLER**  
*Is a Sound and Thrilling Motoring Investment!*

CHRYSLER has enormously made better cars, contributed to the advancement of the modern motor car. And in this point too Chrysler you'll find new engineering features that make longer life, better performance and greater economy.

Powered by a new liquid engine, even bigger cylinder, more powerful than its former predecessor, the Diesel 1900 Chrysler makes new horsepower performance with amazing new stability of economical efficiency.

With the focus now on Chapter 10, *Drive and Symplectic Transmission*, the book explores the various factors that affect a small boat's ability to reach a desired speed. It discusses the relationship between engine power, hull design, and the resulting speed, and provides a detailed analysis of the various factors that can affect a boat's performance.

In this essay, students of mine even, Gershy, has written a beautiful, simple, and...

engineering practices have been a source of innovation at engineering leadership in some of the most successful Chrysler divisions with Chrysler's worldwide Super Truck and its more extensive use of Chrysler's human-drive needs.

It's the job of business strategy engineers to optimize existing performance, optimize the performance of quality engineering, product teams in use and drive the successful use. Chrysler says. Chrysler desires steadily more profit.

add to the cream mixture. Drop by tablespoonfuls into a hot saucepan which has been greased with lard dripping, and set on a boiling gas fire covered with dripping. Or drop by tablespoonfuls into milk which has been well whipped. Bake in a moderate oven—275 deg. Fahr.—about an hour.

### Crumbly Muffins

- 1 Cupful of crackerine, sifted and washed.
- 1/2 Cupful of sugar.
- 1/2 Cupful of flour.
- 1 Teaspoonful of baking powder.
- 1 Teaspoonful of salt.
- 1 Egg, slightly beaten.
- 1 Cupful of milk.
- 1 Teaspoonful of melted butter.

Chop the crackerine tenderly and sprinkle with half the sugar. Sift the remaining sugar, flour, baking powder and salt together. Combine the egg, milk and melted butter and add to the dry ingredients, stirring until well mixed. The ingredients are evenly mixed. Fold in the crackerine. Put into greased muffin tins and bake in a hot oven—425 deg. Fahr.—for about twenty-five minutes. Makes twelve medium-sized muffins.

### Peppery Muffins

- 4 Teaspoonfuls of shortening.
- 2 Teaspoonfuls of sugar.
- 1/2 Egg, well beaten.
- 1 Cupful of melted potatoes.
- 1 Cupful of flour, sifted.
- 5 Teaspoonfuls of baking powder.
- 1 Teaspoonful of salt.
- 1 Cupful of milk.

Grease the shortening with the sugar and cook over a steam until well blended. Add the egg and potatoes and mix thoroughly. Stir the dry ingredients and add with the milk, beating until smooth. Put into greased muffin tins and bake in a moderate oven—350 deg. Fahr.—for twenty-five to thirty minutes. Makes about six dozen medium-sized muffins.

### Peppery Bread Muffins

- 2 1/2 Cupfuls of all-purpose flour.
- 4 Teaspoonfuls of sugar.
- 1 Teaspoonful of baking powder.
- 1/2 Teaspoonful of salt.
- 1 Teaspoonful of shortening.
- 2 Cupfuls of hot water.
- 2 Eggs.
- 1 Cupful of milk.
- 1 Cupful of melted butter, sifted.

4 or 6 medium-sized muffin tins. Grease the tins.

Mix the milk and sugar with the flour, sugar, melted butter and salt. Work in the shortening, add the egg, salt and milk. Then add the remaining flour, sugar and salt. Put into greased muffin tins and bake in a moderate oven—350 deg. Fahr.—for twenty-five to thirty minutes. Makes about six dozen medium-sized muffins.

minutes. Brush with butter five minutes before removing from the oven. Makes eighteen muffins.

### Swedish Open Bread

- 1 Cupful of creamed milk.
- 1 Teaspoonful of melted butter.
- 1 Cupful of milk.
- 1 Teaspoonful of salt.
- 1 Cupful of baking powder.
- 2 Eggs.
- 1 Teaspoonful of baking powder.

Mix the milk and the creamed milk with the butter and baking powder. Beat and smooth. Add the milk, sugar and baking powder. Mix well and turn into a well-greased muffin tin. Bake in a moderate oven—350 deg. Fahr.—for twenty to thirty minutes. Makes about six dozen medium-sized muffins.

### Swedish Biscuits

- 1 Cupful of flour.
- 1 1/2 Teaspoonfuls of salt.
- 1 Teaspoonful of baking powder.
- 1 Teaspoonful of shortening.
- 1 1/2-2 1/2 Cupfuls of creamed milk.

Sift the measured flour, baking powder and salt together. Cut in the shortening with knives or a pastry blender. Add the creamed milk, mixing only until a soft dough is formed. Turn out on a floured board and knead lightly for twenty-five minutes. Roll to three quarters of an inch in thickness, cut with a small biscuit cutter and place on a floured baking sheet. Bake in a hot oven—400-450 deg. Fahr.—for about fifteen minutes. Makes about fifteen biscuits.

### Buttermilk Muffins

- 1 Cupful of flour.
- 1 1/2 Teaspoonfuls of baking powder.
- 1 Teaspoonful of salt.
- 1 Teaspoonful of sugar.
- 1 Teaspoonful of shortening.
- 1 Egg.
- 1 1/2 Cupfuls of milk.
- 1 Cupful of brown sugar.
- 4 Teaspoonfuls of butter.

Sift and measure the flour and salt again with the other dry ingredients. Cut in the shortening. Beat the egg and add it to the milk. Add the gradually to the rest of the ingredients. Turn out on a floured board and knead lightly. Turn out in a rectangular shape about two-thirds of an inch thick. Spread the fling with soft butter and brown sugar. Roll up like a jelly roll and cut into pieces one-half inch thick. Bake in greased muffin tins with the salt.

## Revenge Blackout

A CAUTION of glowing lights over a city as always of tomorrow would afford better protection than a blackout, in the opinion of a few scientists here of General Electric's illuminating laboratory. The reason, conveyed by a huge black cloud, is that the city's lights could be powered secretly by the city's buildings, instead of from the city's power plants, which would be visible to the enemy.

edges of the top and bottom. Bake in a moderate oven—350-375 deg. Fahr.—for twenty-five to thirty minutes.

### Pancakes

- 1 Cupful of flour.
- 1 Teaspoonful of salt.
- 1 Cupful of milk.
- 2 Eggs.
- 1 Teaspoonful of melted butter.

Mix the milk and flour and add the salt gradually, in order to obtain a smooth batter. Add the egg, beaten well, and the butter. Beat two minutes, using a Dover egg beater. Pour the batter into greased muffin tins and bake in a hot oven—400 deg. Fahr.—for twenty to thirty minutes.

### Peanut Butter Muffins

- 1 Egg.
- 1 Cupful of peanut butter, pure, unsalted.
- 1 Teaspoonful of baking powder.
- 1 Cupful of flour.
- 4 Teaspoonfuls of baking powder.
- 1 Cupful of sugar.
- 1 Teaspoonful of salt.

Beat the egg with the peanut butter and add the baking powder. Then add the sugar dry ingredients, stirring until they are well combined. Put into greased muffin tins and bake in a hot oven—400 deg. Fahr.—for twenty-five to thirty minutes. Makes about six dozen medium-sized muffins.

### Apple Muffins

- 4 Teaspoonfuls of shortening.
- 1 Cupful of sugar.
- 1 Egg, well beaten.
- 1 1/2 Cupfuls of all-purpose flour.
- 1 Teaspoonful of baking powder.
- 1 Teaspoonful of salt.
- 1 Cupful of milk.
- 1 Cupful of finely-chopped apples.

1 Teaspoonful of sugar.
- 1 Teaspoonful of salt.
- 1 Cupful of finely-chopped apples.
- 1 Teaspoonful of sugar.
- 1 Teaspoonful of salt.
- 1 Cupful of finely-chopped apples.

Grease the shortening with the sugar and cook over a steam until well blended. Add the egg and apples and mix thoroughly. Stir the dry ingredients and add with the milk, beating until smooth. Put into greased muffin tins and bake in a moderate oven—350 deg. Fahr.—for twenty-five to thirty minutes. Makes about six dozen medium-sized muffins.

any Republic in looking at the world's map. An added advantage of the new type of light would be that the city's lights could be powered secretly by the city's buildings, instead of from the city's power plants, which would be visible to the enemy.
